

PPH-T03

PP HOMOPOLYMER

Properties Typical Value

| Properties | Unit | Value |
|--|-----------------|-------------|
| Cleanliness | piece/kg \leq | 5 |
| MFR | g/10min | 3 \pm 0.5 |
| Impact strength of a cantilever beam, 23°C | J/m \geq | 39 |
| Tensile yield strength | MPa \geq | 32 |
| Isotacticity index | % \geq | 96 |
| Powder Ash | % \leq | 0.02 |

Features

This grade has excellent tensile properties and good processability. It is principally used in the production of plastics woven products. Products made from this resin are water repellent, resistant to corrosion, mildewing, abrasion and have long service lives.

Application

Woven bags, colored stripe cloth for sunlight shading of covering use, carpet backing, container bags, tarpaulin and ropes.

Note: Properties reported here are typical values of the product, not to be considered as specifications.
